[Github/suvajit2640/](https://github.com/suvajit2640/)

Kolkata, West Bengal

SKILLS

- Programming Languages
- C++, JavaScript, TypeScript, SQL
- Web Technologies
- HTML, CSS, React, Nodejs
- Frameworks & Libraries
- React, Tailwind CSS, Bootstrap, Express
- Databases
- MongoDB, MySQL
- Tools
- Git/GitHub, VS Code
- Other
- Data Structures and Algorithms

EDUCATION

- B.Tech in Computer Science and Engineering
- Meghnad Saha institute of Technology
- SGPA : 8.45
- 2021-2025
- Higher Secondary
- Kumar Ashutosh (Main) , Kolkata
- with 84%
- 2021
- Madhyamik
- The Scottish Church Collegiate School , Kolkata
- with 87.42%
- 2019

CERTIFICATES

- [Introduction to C++](#)
- Coding Ninjas
- Feb'22-Apr'22
- [Data Structures in C++](#)
- Coding Ninjas
- Mar'22-Oct'22

COURSE WORK

- DBMS
- OOPS
- Computer Networking
- Operating System

EXPERIENCE

- [Software Developer Trainee](#)
- Itobuz Technologies
- Nov 2024-May 2025
- Gained training expertise on Web Development standards and worked on **MERN** Stack Projects.
 - Built and delivered Notes App as a solo project: a secure, scalable note-taking app with JWT-based authentication and responsive React UI.
 - Collaborated on Innomart, a team-based e-commerce platform with features like user and product management, cart and order systems, coupon handling, and modular dashboards.

SELECTED PROJECTS

- [NoteWorthy](#)
- React, ExpressJs, MongoDB
- Developed a secure full-stack Notes App implementing JWT authentication with **access & refresh tokens**.
 - Implemented **pagination** and **sorting** features for efficient note retrieval.
 - Implemented **debouncing** to minimize API calls.
- [User Authentication System with Express and MongoDB](#)
- Javascript , Nodejs , Expressjs
- Provide users with **secure** registration, login, profile management, and logout functionalities.
 - Passwords** are **securely hashed using bcrypt** before being stored in the database.
 - Added seamless profile update functionality by integrating **AJAX** requests, allowing **real-time updates** on the server and client-side , increasing **retention rates** .
- [Memory Match](#)
- vanilla JavaScript
- A memory matching game where User find and match pairs of identical images by flipping two buttons at a time.
 - Integrated a **dynamic image shuffling algorithm** , randomizing layouts for each gameplay session; increased player engagement through unique and unpredictable experiences.

ACHIEVEMENTS

- Solved Over **200 coding problems** in **Codestudio**
- Solved Over **100 problems** in **GFG**
- Participated in **Smart India Hackathon 2023**
